MISSION

We envision a world free of preventable suffering. Our mission is to partner with underserved communities to make a measurable and sustainable improvement in their health and well-being.

1 BILLION PEOPLE HAVE NEVER SEEN A HEALTH PROVIDER. JOIN US IN BRINGING HEALTH TO FORGOTTEN COMMUNITIES AROUND THE WORLD

“We had women with postpartum hemorrhage, others with retained placenta. Together with the staff of the Casa Materna, we saved them.

- A Mayan Traditional Midwife

“There were outages all the time... with the solar we can provide care continuously with no interruption.... How can I express other than to say that I am really happy with that.

- Minister for Health in Kisii County, Kenya

“It is our good fortune in life to be able to share with those in need, and we believe that Curamericas Global is the best way to do it. We are frugal people and know that Curamericas Global makes the most from every dollar we donate. - Bob & Susan Knowles, supporters of Curamericas since 1999.

YOUR SUPPORT IS POWERFUL

\$25,000
Provides solar power for a health facility

\$10,000
Provides a professional nurse for a year

\$5,000
Supports 20 Community Health Volunteers for a year

\$1,500
Provides delivery and postpartum care for 10 mothers

\$750
Provides one emergency transport (1 - 5 hours to the hospital)

\$500
Provides prenatal, postpartum and breastfeeding classes for 25 women

\$175
Ensures health for five mothers and her family for a year

318 W. Millbrook Rd., Suite 109
Raleigh, NC 27609

HOPE THROUGH HEALTH

IMPACT REPORT

Longtime Kenya Care Group Volunteer, Beatrice, prepares to lead a lesson for pregnant women and mothers on danger signs during pregnancy.

Lesson 3: Pregnancy Danger Signs and Seeking Care

LESSON SUMMARY
1. Game
2. Introduction
3. Story
4. Key Messages
5. Activity
6. Wrap Up

KEY MESSAGES
• Complications during pregnancy may happen at any time
• Experiencing danger signs such as vaginal bleeding, reduced fetal movement, a fever, difficulty breathing, severe abdominal pain, blurred vision, or persistent vomiting during pregnancy means the woman needs to seek immediate care at a health facility

MATERIALS
• Attendance Registers

OUR GLOBAL IMPACT

Since 1983, our programs in Bolivia, Guatemala, Haiti, Kenya, Liberia, Mexico, Sierra Leone and the United States and have served a population of more than 2,000,000 and saved lives of mothers and children through simple, low-cost, community-based services that the people themselves are empowered to provide with our technical support and training. Thousands of volunteers from the United States have traveled to our program sites to participate in our work, transforming the lives of many and making meaningful commitments to serving the less-fortunate members of our global family.

GUATEMALA

Dedicated to integrated community development, our partners in Guatemala are world class public health experts. They operate four “Casa Maternas,” community owned and operated maternity clinics that ensure equitable access to high-quality healthcare, including active community outreach.

Traditional birth attendants work alongside clinic staff to attend to a woman in labor.

Sustainability in action - Of every dollar spent, 93% comes from within Guatemala.
118 Community leaders are trained to lead and support the work.

4 “Casa Materna” MATERNITY CLINICS PROVIDE RESPECTFUL AND CULTURALLY ADAPTED MATERNAL AND NEWBORN CARE

THE “TRIANGLE OF DEATH” IS NOW THE “TRIANGLE OF LIFE”*

58 MATERNAL AND NEONATAL COMPLICATIONS SUCCESSFULLY RESOLVED AT THE CASAS

*When we arrived, where we work in Guatemala was known as the “triangle of death.” The most dangerous thing a rural Mayan woman could do is get pregnant. Today we know it as the “triangle of life” due to the many mothers and babies we have saved since 2002.

KENYA

114 COMMUNITY HEALTH VOLUNTEERS AND HEALTH PROMOTERS

0 MATERNAL DEATHS SINCE SEPT 2021

2 2 SOLAR PANEL INSTALLATIONS ON HEALTH FACILITIES SERVING 21,600 PEOPLE.

HAITI

We have established a 10-year partnership to address the most pressing needs of mothers and children alongside Haiti Outreach Ministries. Our *Healthy Mothers, Healthy Children* project serves extremely impoverished families living in slums on the outskirts of Port-au-Prince.

Serving a population of 2,698, there is no other health care available.

Community-driven lessons on breast cancer and cervical cancer prevention are now offered.

Families have an average income of \$1.56/day.

14 UNIQUE CARE GROUP LESSONS IMPLEMENTED

29 CARE GROUP VOLUNTEERS TRAINED ON DATA COLLECTION AND COMMUNITY HEALTH OUTREACH

68% OF WOMEN NOW PARTICIPATE IN MONTHLY CLASSES, UP FROM ZERO WHEN WE BEGAN IN MAY 2022

In Kenya, our program takes a community-powered approach to tackle pressing health issues. We collaborate with a committed team of Community Health Volunteers, alongside community elders and traditional birth attendants, providing consistent support to mothers and their young ones. Rooted in the community, our program strives each day to cultivate a self-sustaining health system that truly belongs to and benefits the community.

We help health centers stay open 24/7 instead of just during regular office hours.

Sustainability in action - Of every dollar spent, 43% comes from within Kenya.

More than 2,000 women receive health education twice a month from other mothers in their neighborhood

BOLIVIA

220 COMMUNITY HEALTH PROMOTERS TRAINED

200,000 PEOPLE REACHED THROUGH MASS MEDIA

1 WATER TANK INSTALLED FOR A HEALTH FACILITY THAT HAD NO WATER

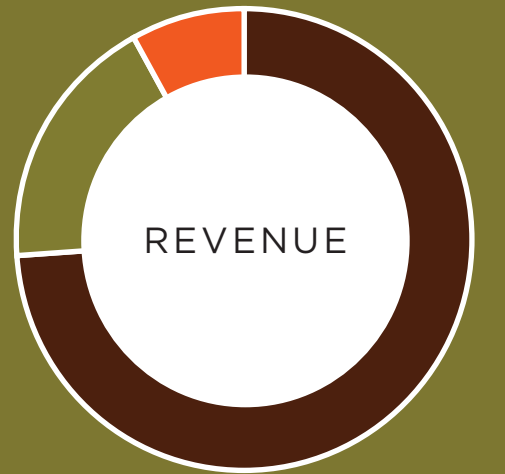

Since 1983, our partners in Bolivia (CSRA) have reduced maternal and child death serving a population of more than 1,500,000 people. Their public health experts treat and prevent frequent and preventable health problems such tuberculosis, malaria, and dengue. In the 1980s, 1 in 5 children in Bolivia died before age 5. Now, child death rates match the US, and there have been no maternal deaths in 15+ years where we work.

CSRA, our Bolivian partners, have been fully independent since 1995.

The Bolivian government has nationalized our model of community health, using censuses, maps and routine home visitation across the country.

Holistic care includes therapy for children with special needs and support for their families through the Rosa Vera Fund.

2022 FINANCIAL SNAPSHOT

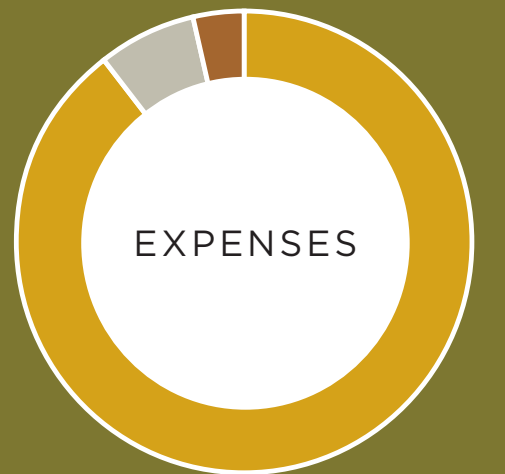

As of 12/31/2022
