

Impact Global Health Alliance

IMPACT REPORT

“ I love what I do. I’ve been a midwife for over 30 years. When the Curamericas Global project of the Casa Materna came here, I began bringing women here because I know I won’t be alone. I have more training and we have seen fewer deaths of both mothers and children because of the project. My name is Ana and I am proud of what I do.”

MISSION

We envision a world free of preventable suffering. Our mission is to partner with underserved communities to make a measurable and sustainable improvement in their health and well-being.

1 BILLION PEOPLE HAVE NEVER SEEN A HEALTH PROVIDER. JOIN US IN BRINGING HEALTH TO FORGOTTEN COMMUNITIES AROUND THE WORLD

“The implementation of solar solutions to our health facility has proven beyond expectations to be a game changer in provision of much needed health services to the community. It has also become a blueprint of the transformative capability and benefits of the limitless renewable green energy.

- Job Atai, head nurse at a facility in Kenya

OUR GLOBAL IMPACT

In the last year, **Impact Global Health Alliance** expanded its life-saving impact, building on 41 years of dedicated service to mothers and children worldwide. In 2023, through collaboration, innovation, and community-driven health programs, we've empowered 5,000+ families, improving their access to essential health services and education. Our efforts have not only saved lives but also nurtured healthier communities, marking a legacy of hope and resilience across the globe.

GUATEMALA

In Guatemala, Indigenous communities face extreme rates of maternal and child mortality and malnutrition. We've partnered with Maya communities for over 20 years, using a local, community-led approach to improve health outcomes. Local champions educate and implement solutions in their own language and context.

OBSTETRICAL
COMPLICATIONS RESOLVED

Regular child health assessments in the home help to prevent malnutrition and illness. Last year we completed 1,930 number of home visits.

83% - Mothers had at least 3 prenatal checks by Casa Materna staff.

74% - Mothers received postpartum home visits within 48 hours of delivery.

95% of all funding comes from local government and communities within Guatemala.

318 births attended at our Maternity Clinics.

1,187 children received clean water and health classes.

Households with a handwashing station with soap, water and receptacle went from 0 to 90% in 2023

HAITI

The work continues uninterrupted despite Haiti's ongoing turmoil, violence, and uncertainty. While other services are sporadic, if available at all, our community health program empowers local moms to teach their neighbors within our evidence-based system.

Baseline Analysis Complete: We've identified the top health priorities that significantly impact our communities as part of our CPIO strategy.

Staff Training Enhanced: Our partner staff gather and analyze data, boosting our capacity for sustainable impact.

Targeted Health Education: Sessions on cholera, malaria, and breast cancer awareness are tailored based on baseline data, addressing the most pressing community health needs.

WOMEN NOW PARTICIPATE IN MONTHLY CLASSES, UP FROM ZERO WHEN WE BEGAN IN MAY 2022

In Kenya, our woman-led, local nonprofit partner has spent five years enhancing maternal and child health through community-driven efforts. We empower communities to improve their health, supported by collaboration with community groups leaders, the private sector, and government, making healthy behaviors practical and sustainable.

97% of mothers receive visits from a Community Health Volunteer to check on the health and well-being of her child and her.

95% of mothers of children under age 1 participate in twice monthly meetings with other mothers in their community.

In the most rural area where we work, we have documented an increase in handwashing stations with soap from 0% to 90% of homes.

HOME VISITS USING THE CBIO METHODOLOGY

In a pivotal shift, our Bolivian partners, CSRA, are transitioning to a private healthcare model after over 25 years of collaboration with the government. Nationwide, Bolivia has embraced CSRA and Impact Global Health Alliance's home visit approach and other CBIO strategies, such as community mapping, ensuring comprehensive health coverage. Despite political challenges, our methods keep maternal and child mortality rates low. Bolivian experts are now extending these life-saving strategies to new underserved areas en el Alto. We are excited to see what good they will do this year!

CSRA, our Bolivian partners, have been fully independent since 1995.

The Bolivian government has nationalized our model of community health, using censuses, maps and routine home visitation across the country.

Holistic care includes therapy for children with special needs and support for their families through the Rosa Vera Fund.

YOUR SUPPORT IS POWERFUL

“The infant mortality is so high [where Impact Global Health Alliance works] ...and the children playing and running around wouldn't be there if it wasn't for Impact Global Health Alliance. When my friends contribute, I can tell them, this is going to take care of families for a year. Every single dollar is watched so carefully in this organization.

– Jill Block, retired nurse anesthetist and donor, Raleigh, N.C.
